Take Your Signal Analysis to the Next Level with Our Portable Spectrum Analyzer

Our Product Introduction

for more products please visit us on spectralanalyser.com

Basic Information

- Place of Origin: CHINA
- Brand Name: JINSP
- Certification: CE
- Model Number: RS1500
- Minimum Order Quantity: 1
- Price: Negotiable
- Packaging Details: Customized Packaging
- Delivery Time: 70-90working days
- Payment Terms: T/T
- Supply Ability: 20 PCS/70-90 days

Product Specification

- Laser: 1064nm
- Size: 160mm* 84mm * 30mm
- Operation: 5" Touch Screen
- Connectivity: USB / Wi-Fi / 4G /Bluetooth
- Highlight: **Portable Spectrum Analyzer**

Product Description

Product Description:

The Narcotics/Explosives Detector is equipped with advanced technology that allows it to quickly and accurately identify illegal substances and explosive materials. It uses a combination of spectroscopy, chromatography, and mass spectrometry to analyze samples and provide accurate results in real-time.

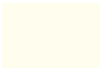

The device is easy to operate, with a user-friendly interface that makes it simple to navigate through the different functions and settings. It also features a large, high-resolution display that provides clear and detailed readings, even in bright sunlight.

One of the key features of the Narcotics/Explosives Detector is its versatility and flexibility. It can be used in a wide range of environments, including airports, border crossings, ports, and other high-security locations. It can also be used by law enforcement agencies, military personnel, and other organizations that require reliable and accurate detection of narcotics and explosives.

In summary, the Narcotics/Explosives Detector is a powerful and versatile handheld signal analyzer that provides reliable and accurate detection of narcotics and explosives. Its advanced technology, user-friendly interface, and long battery life make it an ideal choice for law enforcement agencies, military personnel, and other organizations that require reliable and accurate detection of illegal substances and explosive materials.

Features:

- Handheld and ergonomic design

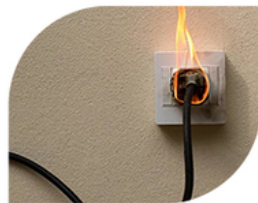

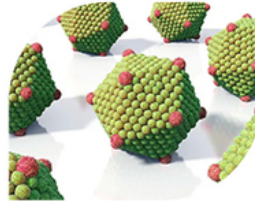

- 
- Analyze and identify the substance in about 3 seconds typically
 - Extensive library-adding new spectrograms Built-in WIFI,4G, camera and barcode scanner
 - Accurate and rapid identification of suspicious substance: Material name and spectrogram

Characteristics

Automatic calibration without manual operation and external accessories

Able to detect small suspicious particles on-site by built-in microscope

Assess the risk of ignition and stop the laser automatically

Penetrate brown glass, some envelopes and plastic packaging

Small and light, it can be carried and operated easily

Total spectrum library is > 13,000 species, and the contraband spectrum library is > 3,000 species

Support for multiple languages

Technical Parameters:

Product Attribute	Description
Type	Handheld Signal Analyzer
Technology	Wireless Spectrum Analyzer
Application	Narcotics/Explosives Detection
Frequency Range	10 MHz to 6 GHz
Display	Field Spectrum Analyzer
Connectivity	Wireless and Wired
Battery Life	Up to 8 hours

Applications:

The JINSP RS1500 is an efficient tool for detecting narcotics and explosives. Its compact Spectrum Analyzer is designed to quickly detect the presence of hazardous substances in a variety of environments. This device has a reliable and fast detection capability, making it a valuable asset in various security settings.

One of the primary applications of the JINSP RS1500 is in airports. With the increasing threat of terrorism, airports require a reliable security system to detect explosives and narcotics. This device is perfect for detecting any dangerous substances that may be present in luggage or on a person. The compact size of this device also makes it easy to use and maneuver in crowded areas. The JINSP RS1500 is also useful in law enforcement. Police officers can use this device during routine traffic stops, at checkpoints, and during raids to detect any narcotics or explosives that may be present. The portable handheld analyzer makes it easy for law enforcement personnel to conduct thorough searches without requiring bulky equipment.

Another application of the JINSP RS1500 is in prisons. This device is an essential tool for prison security personnel to detect any narcotics or explosives that may be smuggled into the facility. The compact spectrum analyzer makes it easy to conduct thorough searches of visitors, employees, and inmates without causing disruption to the daily activities of the prison.

Application Field

✓ Narcotics and precursors

Heroin, Morphine, Methamphetamine, Ketamine, cocaine, MDMA, Fentanyl, Cannabinoid, Ephedrine, Safrole, etc.

✓ Chemical weapon

GB, GD, VX, HD, etc.

✓ Flammable and toxic liquids

Gasoline, Kerosene, Diesel, Methanol, Ethanol, nitromethane, Acetone, Benzene, Toluene, Acetonitrile, Tetrahydrofuran, Chloroform, etc.

✓ Explosives

Ammonium nitrate, Potassium nitrate, C4, Composition B, TNT, RDX, HMX, TNP, TATP, etc.

✓ Other

Starch, Sucrose, Vitamin C, Paracetamol, Analgin, Polyethylene, Polystyrene, etc.

The RS1500 detects liquid and small particle (panel interface can be switched to multiple languages)

Support and Services:

Our Narcotics/Explosives Detector product is designed to provide reliable and accurate detection of illegal drugs and explosives in various settings, including airports, border crossings, and public events. We offer comprehensive technical support and services to ensure that our customers receive the highest level of assistance and maintenance for their products.

Our technical support team is available to provide assistance with installation, setup, and troubleshooting of the Narcotics/Explosives Detector. We also offer training and education services to help our customers maximize the effectiveness of the product and ensure proper usage.

In addition, we offer maintenance and repair services to ensure that the Narcotics/Explosives Detector is functioning properly at all times. Our team of technicians is trained to perform regular maintenance and calibration, as well as repairs and replacements of any parts that may become damaged or worn over time.

Packing and Shipping:

Product Packaging:

1 Narcotics/Explosives Detector
1 AC adapter
1 Carrying case
Instruction manual

FAQ:

Q1: What is the brand name of the Narcotics/Explosives Detector product?

A1: The brand name of the Narcotics/Explosives Detector product is JINSP.

Q2: What is the model number of the Narcotics/Explosives Detector product?

A2: The model number of the Narcotics/Explosives Detector product is RS1500.

Q3: What certification does the Narcotics/Explosives Detector product have?

A3: The Narcotics/Explosives Detector product is certified with CE.

Q4: What is the place of origin of the Narcotics/Explosives Detector product?

A4: The place of origin of the Narcotics/Explosives Detector product is CHINA.

Q5: What is the minimum order quantity for the Narcotics/Explosives Detector product?

A5: The minimum order quantity for the Narcotics/Explosives Detector product is 1.

Q6: What is the price of the Narcotics/Explosives Detector product?

A6: The price of the Narcotics/Explosives Detector product is negotiable.

Q7: What are the payment terms for the Narcotics/Explosives Detector product?

A7: The payment terms for the Narcotics/Explosives Detector product are T/T.

Q8: What is the supply ability of the Narcotics/Explosives Detector product?

A8: The supply ability of the Narcotics/Explosives Detector product is 20 PCS/70-90 days.

Q9: What is the delivery time for the Narcotics/Explosives Detector product?

A9: The delivery time for the Narcotics/Explosives Detector product is 70-90 working days.

Q10: What are the packaging details for the Narcotics/Explosives Detector product?

A10: The packaging details for the Narcotics/Explosives Detector product are customized packaging.
