

3 Second Identification Handheld Raman Analyzer Support Multiple Languages

Our Product Introduction

for more products please visit us on spectralanalyser.com

Basic Information

- Place of Origin: CHINA
- Brand Name: JINSP
- Certification: CE
- Model Number: RS1500
- Minimum Order Quantity: 1
- Price: Negotiable
- Packaging Details: Customized Packaging
- Delivery Time: 70-90working days
- Payment Terms: T/T
- Supply Ability: 20 PCS/70-90 days

Product Specification

- Size: 160mm* 84mm * 30mm
- Identification Time: Analyze And Identify Substance In About 3 Seconds Typically
- Languages: Support For Multiple Languages
- Laser: 1064nm
- Calibration: Automatic Calibration Without Manual Operation And External Accessories
- Identification: Accurate And Rapid Identification Of Suspicious Substance:Material Name And Spectrogram
- Power Supply: Rechargeable Lithium Battery,4-6h
- Spectrum Library: Total Spectrum Library Is 13,000 Species, And The Contraband Spectrum Library Is 3,000 Species

Product Description

3-Second Identification Handheld Raman Analyzer Analyze Substances Quickly

Product Description:

The Handheld Raman Identifier uses a powerful 1064nm laser to analyze substances and determine whether they are hazardous. Its advanced technology allows it to penetrate brown glass, some envelopes, and plastic packaging, making it a versatile tool for detecting potential threats in a variety of settings.

With a rechargeable lithium battery, the Handheld Raman Identifier can operate for 4-6 hours on a single charge, providing you with reliable performance when you need it most. Whether you're working in law enforcement, border security, or any other field where detecting narcotics and explosives is critical, the Handheld Raman Identifier is the ideal tool for identifying potential threats quickly and easily.

Features:

Product Name: Narcotics/Explosives Detector

Design: Handheld and ergonomic design

Penetration: Brown glass, some envelopes and plastic packaging

Spectrum Library: Total spectrum library is 13,000 species, and the contraband spectrum library is 3,000 species

Application Field: Narcotics and precursors, Chemical weapons

Power Supply: Rechargeable lithium battery, 4-6h

Keywords: Handheld Raman Spectrometer, Handheld Raman Identifier, 1064nm Handheld Raman

Characteristics

Automatic calibration without manual operation and external accessories

Able to detect small suspicious particles on-site by built-in microscope

Assess the risk of ignition and stop the laser automatically

Penetrate brown glass, some envelopes and plastic packaging

Small and light, it can be carried and operated easily

Total spectrum library is > 13,000 species, and the contraband spectrum library is > 3,000 species

Support for multiple languages

Technical Parameters:

Technical Parameter	Description
Microscope	Able to detect small suspicious particles on-site by built-in microscope
Result	Name, Property, Spectrum, MSDS, Result-report
Power Supply	Rechargeable lithium battery, 4-6h
Application Field	Narcotics and precursors, Chemical weapons
Spectrum Library	Total spectrum library is 13,000 species, and the contraband spectrum library is 3,000 species
Calibration	Automatic calibration without manual operation and external accessories
Library	Extensive library-adding new spectrograms Built-in WIFI,4G,camera and barcode scanner
Identification	Accurate and rapid identification of suspicious substance:Material name and spectrogram
Languages	Support for multiple languages
Identification Time	Analyze and identify the substance in about 3 seconds typically

Applications:

The JINSP RS1500 is designed to be user-friendly, with support for multiple languages and customizable packaging. It can accurately and rapidly identify suspicious substances, providing material name and spectrogram information to the user. Its extensive library includes new spectrograms, and it comes equipped with built-in WIFI, 4G, a camera, and a barcode scanner for added convenience.

The JINSP RS1500 is perfect for a range of product application occasions and scenarios. It can be used by law enforcement agencies, customs officials, and security personnel to detect narcotics and explosives in a variety of settings, including airports, bus and train stations, and border crossings. It can also be used in industrial settings, such as manufacturing plants and warehouses, to ensure that hazardous materials are not being transported or stored improperly.

The JINSP RS1500 is an essential tool for anyone who needs accurate and reliable on site detection of narcotics and explosives. Its handheld design makes it easy to use and transport, and its advanced features and capabilities make it a must-have for professionals in a variety of fields.

Application Field

✓ Narcotics and precursors

Heroin, Morphine, Methamphetamine, Ketamine, cocaine, MDMA, Fentanyl, Cannabinoid, Ephedrine, Saforele, etc.

✓ Chemical weapon

GB, GD, VX, HD, etc.

✓ Flammable and toxic liquids

Gasoline, Kerosene, Diesel, Methanol, Ethanol, nitromethane, Acetone, Benzene, Toluene, Acetonitrile, Tetrahydrofuran, Chloroform, etc.

✓ Explosives

Ammonium nitrate, Potassium nitrate, C4, Composition B, TNT, RDX, HMX, TNP, TATP, etc.

✓ Other

Starch, Sucrose, Vitamin C, Paracetamol, Analgin, Polyethylene, Polystyrene, etc.

The RS1500 detects liquid and small particle (panel interface can be switched to multiple languages)

Support and Services:

Our Narcotics/Explosives Detector product is designed to provide accurate and reliable detection of illicit substances and explosive materials. We offer comprehensive technical support and services to ensure that our customers are able to effectively utilize and maintain their detectors. Our support includes detailed user manuals, training programs, and troubleshooting guides. Additionally, we offer repair and calibration services to ensure that our detectors are always operating at peak performance. Our team of experienced technicians is available to answer any questions and provide assistance as needed.

Certifications

Packing and Shipping:

Product Packaging:

The Narcotics/Explosives Detector will be packaged in a sturdy cardboard box with foam inserts to securely hold the product and its accessories in place during transit. The box will also include an instruction manual and a power cord for the detector.

Shipping:

The product will be shipped via a reputable courier service to ensure timely and secure delivery. The package will be tracked and insured for the full value of the product. Shipping options and costs will be provided at checkout and vary based on the destination and urgency of the order.

FAQ:

Q1: What is the brand name of this Narcotics/Explosives Detector?

A1: The brand name of this product is JINSP.

Q2: What is the model number of this product?

A2: The model number of this product is RS1500.

Q3: Is this Narcotics/Explosives Detector certified?

A3: Yes, this product is certified with CE.

Q4: What is the place of origin for this product?

A4: The place of origin for this product is China.

Q5: What is the minimum order quantity for this product?

A5: The minimum order quantity for this product is 1.

Q6: What is the price of this product?

A6: The price of this product is negotiable.

Q7: What are the payment terms for this product?

A7: The payment terms for this product are T/T.

Q8: What is the supply ability for this product?

A8: The supply ability for this product is 20 PCS/70-90 days.

Q9: What is the delivery time for this product?

A9: The delivery time for this product is 70-90 working days.

Q10: What are the packaging details for this product?

A10: The packaging details for this product are customized packaging.
