

Ergonomic Handheld Spectrum Analyzer For Taking Control Of Signal Analysis

Our Product Introduction

for more products please visit us on spectralanalyser.com

Basic Information

- Place of Origin: CHINA
- Brand Name: JINSP
- Certification: CE
- Model Number: RS1500
- Minimum Order Quantity: 1
- Price: Negotiable
- Packaging Details: Customized Packaging
- Delivery Time: 70-90working days
- Payment Terms: T/T
- Supply Ability: 20 PCS/70-90 days

Product Specification

- Laser: 1064nm
- Size: 160mm* 84mm * 30mm
- Power: Rechargeable Li-ion Battery
- Operation: 5" Touch Screen
- Highlight: **Ergonomic Handheld Spectrum Analyzer, Ergonomic portable spectrum analyser, 1064nm Handheld Spectrum Analyzer**

Product Description

Take Control of Signal Analysis with Our Handheld Spectrum Analyzer

Uses Raman Spectroscopy Technology

Handheld Raman Identifier

RS1500

Product Description:

With its advanced technology, this detector is able to quickly and accurately identify the presence of a wide range of narcotics and explosives, TNT, and C4. The device works by analyzing the molecular composition of the substance in question, using a combination of spectroscopic and chromatographic techniques.

One of the key features of this product is its portability. Unlike traditional laboratory equipment, which can be bulky and difficult to transport, this detector is compact and lightweight, making it easy to take with you wherever you go. The device runs on a rechargeable battery, which provides several hours of continuous use, and it comes with a rugged carrying case for added protection.

Another important feature of this product is its ease of use. The device is designed to be intuitive and user-friendly, with a simple interface that allows you to quickly and easily analyze samples. The device also has a built-in database of known narcotics and explosives, which can be updated regularly to ensure that you always have the most up-to-date information.

In addition to its use in law enforcement and military applications, this detector is also ideal for use in a wide range of other settings. For example, it can be used in airports and other transportation hubs to screen passengers and luggage for narcotics and explosives. It can also be used in customs and border control settings to prevent the illegal import and export of controlled substances.

Features:

- Handheld and ergonomic design
- Analyze and identify substance in about 3 seconds typically
- Extensive library-adding new spectrograms Built-in WIFI,4G,camera and barcode scanner
- Accurate and rapid identification of suspicious substance:Material name and spectrogram

Technical Parameters:

No	Item	Description
1	Laser	1064nm
2	Size	160mm* 84mm * 30mm
3	Weight	730g
4	Connection	Wi-Fi,4G,Bluetooth,Micro-USB
5	Power Supply	Rechargeable lithium battery,4-6h
6	Database	Narcotics&Precursors,Explosives,Dangerous Liquid,Gem.etc
7	Result	Name,Property,Spectrum,MSDS,Result-report

Characteristics

Automatic calibration without manual operation and external accessories

Able to detect small suspicious particles on-site by built-in microscope

Assess the risk of ignition and stop the laser automatically

Penetrate brown glass, some envelopes and plastic packaging

Small and light, it can be carried and operated easily

Total spectrum library is > 13,000 species, and the contraband spectrum library is > 3,000 species

Support for multiple languages

Applications:

The JINSP RS1500 is a handheld spectrum analyzer that is easy to use and can be carried around easily. This makes it ideal for use in

various applications such as border control, law enforcement, and military operations. The device is also useful in forensic investigations and can be used to detect the presence of narcotics and explosives in crime scenes.

The JINSP RS1500 is suitable for use in a variety of scenarios and occasions. It is useful in airports, where it can be used to detect illegal substances in baggage and cargo. It is also suitable for use in government buildings, where it can be used to detect explosives and other dangerous materials. The device is also useful in public events such as concerts and sports events, where it can be used to detect substances that may pose a threat to public safety.

Application Field

✓ Narcotics and precursors

Heroin, Morphine, Methamphetamine, Ketamine, cocaine, MDMA, Fentanyl, Cannabinoid, Ephedrine, Safrole, etc.

✓ Chemical weapon

GB, GD, VX, HD, etc.

✓ Flammable and toxic liquids

Gasoline, Kerosene, Diesel, Methanol, Ethanol, nitromethane, Acetone, Benzene, Toluene, Acetonitrile, Tetrahydrofuran, Chloroform, etc.

✓ Explosives

Ammonium nitrate, Potassium nitrate, C4, Composition B, TNT, RDX, HMX, TNP, TATP, etc.

✓ Other

Starch, Sucrose, Vitamin C, Paracetamol, Analgin, Polyethylene, Polystyrene, etc.

The RS1500 detects liquid and small particle (panel interface can be switched to multiple languages)

Support and Services:

The Narcotics/Explosives Detector product technical support and services include:

- Online user manuals and guides
- Technical assistance via phone or email
- Troubleshooting and problem-solving assistance
- Repair and maintenance services
- Software updates and upgrades
- Training and education programs for users and technicians

Packing and Shipping:

Product Packaging:

The Narcotics/Explosives Detector product will be packaged in a secure and sturdy box to ensure its safety during transportation.

The box will be labeled with the product name, model number, and other necessary information.

The product will be accompanied by a user manual and any relevant accessories.

Shipping:

The Narcotics/Explosives Detector product will be shipped via a trusted and reliable shipping carrier.

The shipping carrier will be selected based on the destination, shipping method, and customer preference.

The product will be insured during shipping to protect against any damage or loss.

The customer will be provided with a tracking number to monitor the status of their shipment.

FAQ:

Q: What is the brand name of the Narcotics/Explosives Detector product?

A: The brand name of the Narcotics/Explosives Detector product is JINSP.

Q: What is the model number of the Narcotics/Explosives Detector product?

A: The model number of the Narcotics/Explosives Detector product is RS1500.

Q: What is the certification of the Narcotics/Explosives Detector product?

A: The Narcotics/Explosives Detector product is certified with CE.

Q: What is the place of origin of the Narcotics/Explosives Detector product?

A: The place of origin of the Narcotics/Explosives Detector product is CHINA.

Q: What is the minimum order quantity of the Narcotics/Explosives Detector product?

A: The minimum order quantity of the Narcotics/Explosives Detector product is 1.

Q: What is the price of the Narcotics/Explosives Detector product?

A: The price of the Narcotics/Explosives Detector product is negotiable.

Q: What are the payment terms for the Narcotics/Explosives Detector product?

A: The payment terms for the Narcotics/Explosives Detector product are T/T.

Q: What is the supply ability of the Narcotics/Explosives Detector product?

A: The supply ability of the Narcotics/Explosives Detector product is 20 PCS/70-90 days.

Q: What is the delivery time of the Narcotics/Explosives Detector product?

A: The delivery time of the Narcotics/Explosives Detector product is 70-90 working days.

Q: What are the packaging details of the Narcotics/Explosives Detector product?

A: The packaging details of the Narcotics/Explosives Detector product are customized packaging.
