Product Description

Compact Modular Fiber Optic Spectrometer 200nm - 1100nm

SR50C's hybrid grating technology delivers exceptional linearity ($R^2 > 0.9995$) across the UV-VIS spectrum - critical for detecting phosphorus absorption bands at 210nm and 880nm. The hermetically sealed optical bench prevents humidity-induced drift during long-term outdoor deployments.

With customizable measurement protocols and 8-hour continuous operation capability, this spectrometer becomes the perfect partner for watershed patrols and emergency spill response teams. Its non-contact fiber probe allows safe analysis of corrosive or toxic water samples.
